

**DriveBeans**

Personal

Private

**A****NOTE**

Change url addresses in pages and database connection and signout link in asset script

**To Do**

user\_group user\_group\_id  
user\_group\_name  
user\_group\_members  
user\_group\_member\_id  
user\_group\_id user\_id

Share odel

share and create group , share in groups

shared - file : delete file update on db , while fetching store deleted files in array and check in open folder if in array

save shared file in drive ( copy folder ) , rename file

forgot , reset

**Done**

Scrollable Status div

while delete file update user\_file and user\_file\_share db

delete file , delete selected files

share file ui remaining

```
var zip = new JSZip();
zip.file("Hello.txt", "Hello World\n");
var img = zip.folder("images");
zip.generateAsync({type:"base64"}).then(
function (base64) {
location.href="data:application/zip;base64," + base64; });
```

dummy select option share file  
change to fetching list of users in  
options

<https://stuk.github.io/jszip/> for upload  
folder

profile -> user directory size

login , register

logout

dynamic update every 10 sec with  
response timeout of 3sec
